Key Environments

High Yield Environment	Highly Suitable
Irrigation	Highly Suitable
Frequent Winterkill Area	Suitable
Lodging Prone Environments	Manage Appropriately
Heavy PLH pressure	Manage Appropriately

Suitability

Heavy Soils with Root Rot Issues	Suitable
Frequent cuttings	Highly Suitable
High Forage Quality	Highly Suitable
Fast Recovery	Highly Suitable
Roundup Ready	Highly Suitable

Soils

Well-Drained Soils	Highly Suitable
Poorly Drained Soils	Suitable

Traits Scores for 55VR06* (RR)

Characteristics Scores

Forage Yield	9
Field Appearance	9
Fall Dormancy	5
Winterhardiness	VH
Disease Resistance Index	32
Relative Forage Quality	8

Disease Scores

Bacterial Wilt	HR
Vert. Wilt	HR
Fusarium Wilt	R
Phytophthora Root Rot	HR
Aphanomyces (Race 1)	HR
Aphanomyces (Race 2)	MR
Anthracoze	HR

Featured Traits

Disease/Pest Resistance Key: 9 = HR; 7-8 = R; 5-6 = MR; 3-4 = LR; 1-2 = S; Blank = Insufficient Data

IMPORTANT: Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Positioning information is based upon historical observations and analysis of traits by Pioneer Agronomists and Research Managers. Trait scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2012 harvest and were the latest available at time of printing. Some scores may change after 2013 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Products within a family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com/products or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product.

HERBICIDE RESISTANCE: Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. Do not export Genuity® Roundup Ready® Alfalfa seed or crop, including hay or hay products, to China pending import approval. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Always read and follow pesticide label directions. Crops that contain the Roundup Ready gene confer tolerance to glyphosate, the active ingredient in Roundup® agricultural herbicides. Roundup agricultural herbicides will kill plants that are not tolerant to glyphosate. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization. Roundup Ready® and Genuity® are registered trademarks used under license from Monsanto Company.
