

Positioning For:

Soft Red Winter Wheat:

25R30

Maximizing Local Performance

25R30 is a broadly adapted, high yielding awned variety with exceptional test weight.

Management Comments

- For optimum performance, plant on or up to two weeks after the fly free date.
- Large seeded with moderate winterhardiness
- Very good drought tolerance

Key Environments

High yield environments Highly Suitable
 Low yield environments Suitable
 Wheat in corn stubble Suitable

Suitability

Intensive Management Highly Suitable
 Late Planting Suitable
 Low Population Manage Appropriately

Traits Scores for 25R30

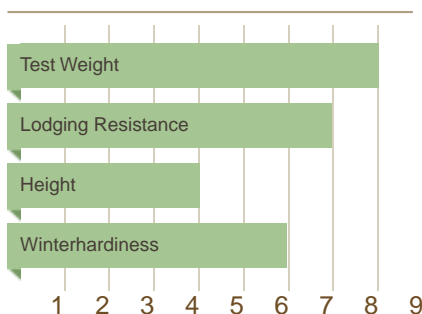

Characteristics Scores

Yield	9
Test Weight	8
Seed Size	9
Lodging Resistance	7
Height	4
Winterhardiness	6
Head Type	Awned
Heading Date North	0

Diseases Scores

Leaf Rust	6
Powdery Mildew	7
Scab	4

[1]IMPORTANT: Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Positioning information is based upon historical observations and analysis of traits by Pioneer Agronomists and Research Managers. Trait scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2012 harvest and were the latest available at time of printing. Some scores may change after 2013 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Products within a family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com/products or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product.
